## zamil steel vietnam

Zamil Steel Vietnam is a joint venture between Mitsui & Co. of Japan and Zamil Steel Industrial & Investment Company of Saudi Arabia, the largest pre-engineered steel building and metal buildings manufacturer in the Middle East, Asia, Africa, and Europe. ZSV manufactures a total 100,000 MT of fabricated steel per annum of low & high rise steel buildings and structures for diverse industrial, commercial, agriculture, aviation, entertainment and military applications. Established since 1997, ZSV has engineered, manufactured and supplied over 5,000 steel buildings to various part of Asia Pacific.

To learn more about ZSV, please visit [www.zamilsteel.com.vn](http://www.zamilsteel.com.vn)

# zamil steel global network

8 factories and 62 offices across Asia. Africa, Europe and Oceania

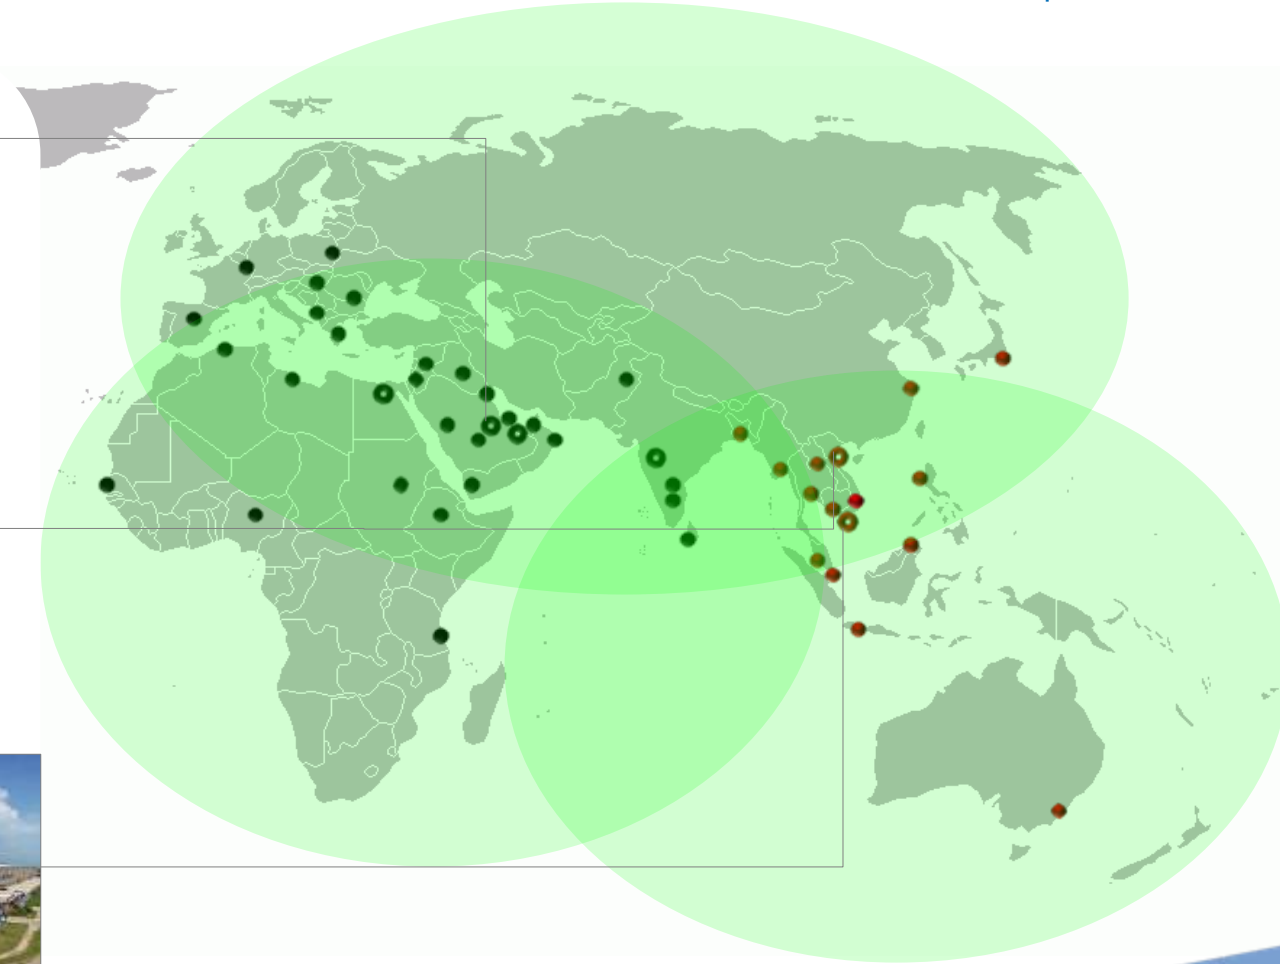

**HQ** dammam, saudi arabia

**1<sup>st</sup>** vietnam factory – hanoi

**2<sup>nd</sup>** vietnam factory – dong nai

# our manufacturing facilities

2 state of the art ZSV factories in Vietnam – most advanced in this region

## Hanoi Factory

Located on a 41,200 SQM plot, house the head office of Asia Pacific operation and factory

## Dong Nai Factory

Total of 45,000 SQM plot that possesses cutting edge technologies for the fabrication of Open Web Steel Joists and Structural Steel products on top of our main stream product Pre-Engineered Steel Buildings

Zamil Steel Vietnam (ZSV) produces

**100,000MT**  
of steel buildings per annum

### we design

Creating efficient, innovative and sustainable steel building solutions

### we fabricate

Building your steel structure using our global expertise gathered over 30 years

### we deliver

Only the product of continual enhancement and highest quality will be delivered to you

# our expertise

Solutions provider for virtually all kind of steel buildings

## pre-engineered steel buildings

Customized steel buildings tailor made to user's architecture and engineering requirements

Maximum economy can be achieved with buildings of span up to 60 m and eave height below 30m for medium loading with cranes

APPLICATIONS: factories, steel mills, fertilizer plant, warehouse, aircraft hangars and other industrial and commercial uses

## structural steel

Diversified product line of ZSV that tackles virtually any steel buildings or structures

ZSV possesses the equipments and expertise to fabricate and process the raw structural steel materials for the construction of almost all kinds of steel structures

APPLICATIONS: power plants, petrol chemical plants, equipment racks, high-rise buildings and other heavy industrial and commercial uses

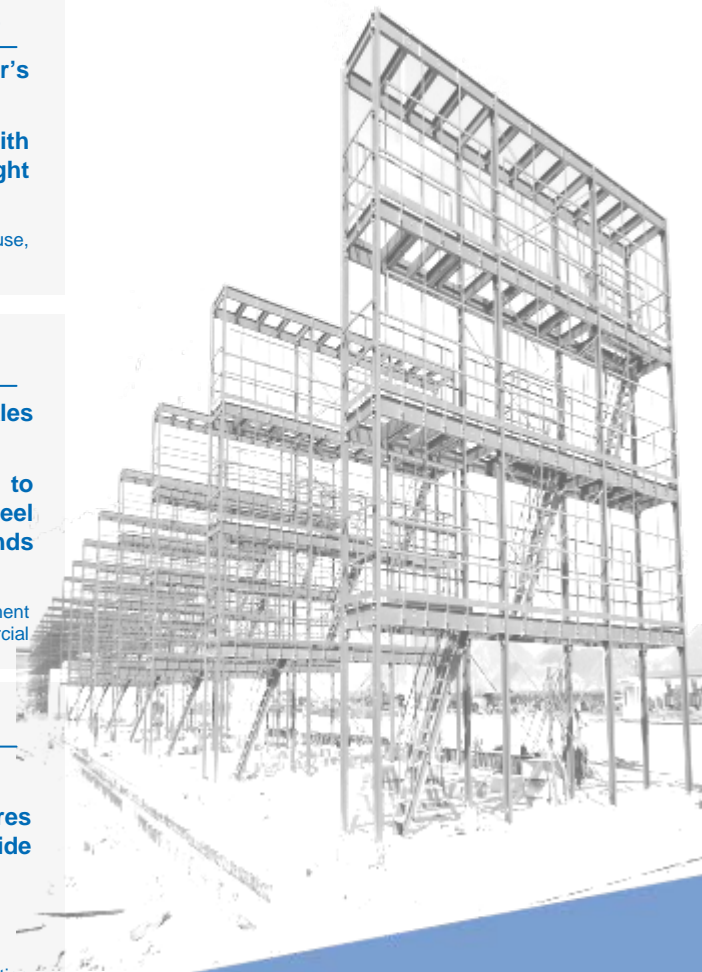

## open web steel joists

Light weight steel truss

Greatest economy will be realized for structures that require huge height clearance and clear wide span

APPLICATIONS: institutional buildings, distribution centers, aviation hangars, warehouses and other commercial and industrial uses

manufacturing plant

warehouse

aircraft hangar

# our projects

Backed by more than 30 years of steel building experiences and strong records, we have the ability to design and supply virtually any steel buildings. From low rise to mid-rise, commercial to institutional, light to industry to heavy industry we give you our commitment on quality product.

petro-chemical plant

pipe rack

high-rise

mobile workshop

shopping mall

steel mill

## our projects

roof support system

manufacturing plant

# our clients

Over 50,000 satisfied owners of zamil steel buildings worldwide

some top brands includes

and more...

# our contacts

17 ZSV asia pacific sales offices and liaison centers located near you
